Lagos, Nigeria | +234-810-365-0076 ahamefula.uzoma@gmail.com | LinkedIn Profile ([linkedin.com/in/aham-uzoma-53089a105/](https://www.linkedin.com/in/aham-uzoma-53089a105/)) | GitHub Profile (github.com/aham-uzoma)

PROFESSIONAL SUMMARY Full Stack Software Engineer with 8 years of practical experience in core software development, AI, and Machine Learning. proven track record of managing over 19 projects across Fintech, Education, and Logistics industries. Expert in transforming complex ideas into functional, market-ready applications using Python, Java, and JavaScript stacks. Specialized in building AI-driven solutions, including chatbots, NLP models and RAGs to enhance business automation and user engagement.

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, TypeScript, SQL, HTML/CSS
- **Frameworks & Libraries:** Spring Boot, React.js, React Native, Next.js, Node.js, Redux
- **AI & Machine Learning:** NLP, Computer Vision, SpaCy, LSTM, ARIMA, TensorFlow/Keras (implied), Named Entity Recognition (NER), RAGs
- **Databases:** PostgreSQL, MySQL, MongoDB, Oracle Database
- **Cloud & DevOps:** AWS (Certified Cloud Practitioner), Git, GitHub Actions, CI/CD, Microservices Architecture

PROFESSIONAL EXPERIENCE

CASA | *Full-Stack Software Engineer (Freelance)* | Remote Nov 2022 – Present

- Architected and deployed a cloud-based business management platform for Nigerian SMEs using the JavaScript stack, MongoDB, and AWS, streamlining bookkeeping and inventory control.
- Led the end-to-end development of fintech platforms featuring secure payment gateways, user verification systems, and transaction analytics.
- Engineered AI-driven chatbots to automate customer support and business processes, significantly improving user engagement and operational efficiency.
- Developed robust enterprise software solutions for clients in healthcare, logistics, and retail, utilizing cross-platform mobile apps for real-time data synchronization.

ST. PATRICK'S MODEL SCHOOLS | *ICT Head & Project Manager* | Nigeria 2019 – 2022

- Orchestrated the school's digital transformation by developing a comprehensive web platform (stpatricksmodelschools.org) that automated admissions, grading, dormitory operations, and accounting.
- Built a custom School Management System using Node.js and MongoDB (Backend) and React.js (Frontend), serving administrators, teachers, and students.

- Led the emergency transition to virtual learning during the COVID-19 pandemic, implementing digital classrooms that ensured uninterrupted education for the student body.
- Conducted technical training for teaching staff, upskilling them in remote teaching tools and digital engagement strategies.

LIVEKAMPUS TECHNOLOGIES | *Co-Founder & Head of Product/UX* | Nigeria 2015 – 2018

- Spearheaded the full-stack development lifecycle of Livekampus.com, a web platform connecting students with off-campus housing using Spring Boot (Java) and MySQL.
- Designed a secure, scalable microservices architecture and implemented a comprehensive test suite to ensure platform stability.
- Utilized React and TypeScript to create a responsive, mobile-optimized user interface, collaborating closely with UI/UX designers.
- Analyzed user data to provide universities with insights into student housing preferences, driving platform improvements.

NIIT | *Student Facilitator & Trainer* | Nigeria 2014

- Facilitated training sessions for peers on Java Enterprise applications and Oracle Database management.
- Simplified complex technical concepts including Data Modeling, Normalization, and SQL for students.

KEY TECHNICAL PROJECTS

Stock Price Prediction Model (AI/ML) | *Python, NLP, LSTM*

- Developed a stock market prediction model leveraging NLP to analyze financial news and social media sentiment.
- Integrated real-time data pipelines for unstructured text ingestion and applied Named Entity Recognition (NER) and topic modeling.
- Implemented time-series forecasting models (LSTM, ARIMA) to combine NLP outputs with historical price data for enhanced prediction accuracy.

PII Extraction Pipeline (Data Security) | *Python, SpaCy, NER*

- Built a Named Entity Recognition (NER) pipeline to detect and extract Personally Identifiable Information (PII) from educational datasets.
- Trained custom NER models using SpaCy for domain-specific tagging and implemented post-processing for data anonymization and compliance.

EDUCATION & CERTIFICATIONS

- **Bachelor of Engineering (B.Eng), Electronics and Computer Engineering** | Nnamdi Azikiwe University, Awka

- *Final Project:* Built "ZikBot," a semi-autonomous bomb disposal robot.
- **AWS Certified Cloud Practitioner** (2024)
- **Machine Learning & NLP Certification** - Udemy (2024)
- **Complete AI & Machine Learning Bootcamp** - Zero To Mastery Academy (2022)
- **Oracle Database Administrator & Java Enterprise Developer** - NIIT (2014)
- **DAAYTA 2020 Finalist** - Asset & Resource Management Holding Company
